

FireSmart Canada has recently launched their **FRENCH** version of their website. All resources can be found through this link-

[Intelli-feu Canada | Intelli-feu dirige l'élaboration de ressources et de programmes pour aider les Canadiens à accroître leur résilience face aux feux de forêt \(intellifeucanada.ca\)](https://intellifeu.canada.ca/)

Online Courses/Training

1. FireSmart 101 is a FREE online course for individuals to take to gain a better understanding of FireSmart and the mitigation strategies they've developed.

[FireSmart 101 | FireSmart Canada](https://firesmartcanada.ca/)

2. Level 1- FireSmart Ambassador Training: FireSmart Ambassadors are frontline representatives, knowledgeable about FireSmart within the local community. As promoters of FireSmart guidelines, programming, and concepts, they play a foundational role in building awareness of and promoting wildland fire prevention and encouraging action within their community.

General Information & Resources

3. This first link takes individuals to a page that provides a general description of FireSmart and provides some helpful links for those who are just getting started with FireSmart. This page is an essential first step when first navigating through FireSmartCanada.ca and several resources & tools can be found here.

[About FireSmart | FireSmart Canada](https://firesmartcanada.ca/)

[Homeowner Resources | FireSmart Canada](https://firesmartcanada.ca/)

4. Neighbourhood Recognition Program- Covers all information regarding the NRP and how communities can get involved. Criteria and requirements to becoming recognized are all listed here;

<https://firesmartcanada.ca/programs/neighbourhood-recognition-program/>

5. This link focuses on the yard and landscaping side of FireSmart. Page offers valuable information on fire-resistant vegetation and flammable vegetation species. This page also has a direct link to a video explaining and diving more into the vegetation discipline which is one of the 7 disciplines of FireSmart. The landscaping guide is very helpful for those interested in planting more fire-resistant vegetation around their property.
